

Summary of ILRS 19th Workshop Station Clinic
Friday October 31, 2014 Annapolis Maryland USA
Two-Fold Quality, Report Card Review
T. Otsubo/M. Torrence

Some thoughts from this session:

- It was very good to get to know and interact with the station representatives.
- Language-based, station-based grouping was nice.
- It seemed stimulating to compare station performance with other stations.
- Time allotted for the sessions was great. Speakers could visit other tables. The number of tables was greater than the number of groups.
- However, it would have been good if Chinese and Russian (and NASA!) stations managers attended the clinic.
- Suggest that organizers NOT arrange the clinic sessions AFTER the workshop closing sessions.
